INTRODUCTION
This specification provides an overview to the LRN Level 3 Diploma in Digital Entrepreneurship for candidates, centres, administrators, employers, teachers and examiners. The specification outlines the key features and administrative procedures required for this qualification.

OBJECTIVE
The LRN Level 3 Diploma in Digital Entrepreneurship is designed to help candidates in developing their understanding and knowledge of digital entrepreneurship.

CANDIDATE CATEGORY
Candidates for the LRN Level 3 Diploma in Digital Entrepreneurship will include those who:

1. are new to the work environment;
2. have a limited experience of work and want to increase their knowledge;
3. do not have a formal qualification in business and want to obtain one.

MODE OF DELIVERY
This qualification has been constructed to be delivered within centres or via distance learning. Centres will need to demonstrate to LRN, through the centre recognition processes, that they have the resources, facilities and competence to deliver through either method. Centres may apply to offer through both means if so desired. However, centres must be able to demonstrate, in line with LRN’s criteria, that they have the means, capability, capacity and resources (including suitably qualified centre staff) to deliver by the method chosen by the centre.
PROGRESSION
LRN Level 3 Diploma in Digital Entrepreneurship has been designed to reflect the wide variation in candidates' origins, levels of education and career aims. Progression opportunities may, therefore, take a variety of paths. Depending on the level of qualification achieved, it may be appropriate for the candidate to progress to:

- A Level 4 qualification in digital entrepreneurship
- A higher level of any qualification – e.g. Degree
- Vocational qualifications
RECOGNITION OF PRIOR LEARNING
Please refer to LRN’s policy on the Recognition of Prior Learning to determine whether previously achieved qualifications meet LRN’s policy on possible exemptions.

LANGUAGE OF ASSESSMENT
LRN aims to use English that is plain, clear, free from bias and appropriate to all candidates. LRN will ensure the assessment materials, stimuli and the assessment itself is carried out in English.

QUALIFICATION OVERVIEW
The LRN Level 3 Diploma in Digital Entrepreneurship is a three-unit qualification. This qualification is assessed by written exam, which is externally set internally marked and moderated by LRN. Candidate must pass all three units to achieve the qualification. The qualification has a credit value of 60.

ASSESSMENT
The assessment consists of written exam externally set and marked by LRN. The marking of exams will be carried out in accordance with completion of the learning outcomes and the assessment criteria listed in the exams. To ensure a rigorous quality assurance model is applied, each of the marked exams will be moderated.

Appendix 1

Introduction

1.1 The making descriptors are applicable to all candidates’ work.

The descriptors have been developed with reference to the FHEQ credit level descriptors

The appropriate descriptors should be made available to candidates in course documentation.

1.2 The descriptors are generic and applicable to a broad range of academic disciplines.

They aim to provide: a reference for articulating the standards of students’ work with the use of clear, consistent statements to describe candidate performance and what a candidate needs to do to reach a particular grade/mark band; a framework to indicate how a student can improve their performance, and to facilitate feedback to candidates.

2. Use of the grading descriptors

2.1 Candidates’ work should be assessed against published assessment criteria and marked/graded using the generic descriptors, including where work is marked as pass or fail. The descriptors describe key features and general characteristics of assessed work associated with each grade and where necessary they can be adapted (refer 2.3).

For candidates to understand what they are being assessed on, clear assessment criteria and grading descriptors are needed. It is also important to ensure that the learning outcomes of the assessment are integrated with the grading descriptors.

2.2 The descriptors are inter-related and should not be interpreted as a series of mutually exclusive categories. Candidates’ work may demonstrate some characteristics of, for example, the pass, merit and distinction categories and the final mark/grade for the work should always be matter of academic judgement. The emphasis given to various aspects of the descriptors will vary depending on the nature of the assessment task and discipline area.

Examiners/Assessors should use the whole of the marking scale, interpreting the descriptors in the context of their discipline.

2.3 The descriptors may be used as they are or contextualised in the design of assessment specific criteria in the context of a particular discipline, mode of assessment and in the development of criteria. These should clearly link back to the generic descriptors.

Where the design of a module and its associated assessment task(s)/brief(s) mean that it is not appropriate to grade candidates’ work using these descriptors, for example multiple choice examinations or competency-based/observation type tasks, details of how the task(s) will be assessed should be clearly stated in the relevant unit outline.
